Nishith Desai Associates develops AI Bot for its lawyers, NaiDA

ITN (Https://Indiatechnologynews.In/Author/Admin/)   4 hours ago

Nishith Desai Associates ("NDA"), a globally recognized law firm celebrated for its continuous innovation at the intersection of law and technology, is pleased to announce the launch of NaiDA, an in-house developed AI Bot exclusively designed for our lawyers. NaiDA has been meticulously built with precision and sophistication, with the understanding that it will not be used without customisation for client projects. Built on the advanced GPT-4 model from OpenAI and hosted on AWS servers, NaiDA is designed to empower our lawyers with intelligent insights in their daily workflows.

The current dataset comprises multiple cross-industry research papers, M&A labs, hotlines, podcasts, videos, and other content developed by the firm over the years. The AI Bot enables legal research and content integration, among other possibilities yet to be explored. As a law firm, we thrive on our objective to deliver the highest quality of work in the shortest

possible time. We aspire to grow along with our clients while thinking ahead to the future. We celebrate opportunities to walk the extra mile, with a collective endeavour to conceive creative solutions for the issues that are likely to arise in the future.

Nishith Desai, Founder, Nishith Desai Associates said "With the introduction of NaiDA, we are reinforcing our 100% commitment to legal innovation. Over the years, technology has played a catalyst role in driving socio-economic growth. And now, it is time for the legal industry to harness its full potential. However, we must note that AI is not there to replace lawyers but to elevate our practice. Congratulations to our entire legal engineers' team for their remarkable efforts in developing NaiDA."

Milind Mundankar, Chief Technology Officer, Nishith Desai Associates added "We've witnessed an overwhelming wave of enthusiasm from both our lawyers and client's side regarding Chat-GPT. The excitement is understandable – since it's a tool that not only streamlines processes but, more importantly, saves time, an invaluable asset in today's fast-paced environment. The time efficiency is precisely what we aim to provide our stakeholders. Shortly, we plan to integrate additional external resources and new data sources. With NaiDA, we are dedicated to staying at the forefront of modern technological shifts and providing our stakeholders with cutting-edge solutions."
