– distinctly different

Science is seen
Philosophy is felt
Art is lived
An interplay of the three sets our minds free

Beyond the “Blue-Sky”
Amidst space and time lies a place where;
Knowledge has no boundaries
Information flows freely
Wisdom is shared and
Imagination makes our world better!

RECEPTION-SMILARIUM

RECEPTION-SMILARIUM

Step into a 'virtual reception' experience where sensor based telepresence screens are activated when a guest enters the reception and virtual receptionist greets you, and you are guided in. Enabled by Creston sensors and FST cameras, a profile driven setup which is integrated with Face recognition cameras populate an individual's profile to authenticate and grant access to the different areas inside Imaginarium. The profile which gets activated through the FST sensors uploads the preferences of an individual which are stored in the BMS repository such as lighting, AC cooling, pantry requirements etc. Feel welcomed?
